

**Research Associate, Molecular Biology  
Eureka Therapeutics, Inc.**

**Location:** Emeryville, CA 94608

**Position type:** Full time

**Required education:** B.S.

**Area(s) of expertise desired:** Molecular Biology

**Description:**

The Research Associate, Molecular Biology is to work as part of the research and development team in the Molecular Biology group. This is an exciting opportunity to participate in the discovery and development of novel drug candidates in the field of cancer immunotherapy.

Responsibilities will involve screening and identification of lead antibodies, DNA construct design, generation, and evaluation, and other tasks as assigned, while utilizing a broad repertoire of molecular biology techniques. Other tasks include, but are not limited to, PCR DNA/RNA purification, molecular cloning, and bacterial transformations. He/she will prepare technical reports and presentations to illustrate and explain experiments, data, and conclusions.

**Qualifications:**

Strong verbal and written communication skills are essential to succeed in our fast moving environment. The candidate must be able to work effectively in a team environment and collaborate with scientists and other associates. He/she is expected to maintain accurate, up-to-date records of experiments and promptly report results, therefore good organizational skills are essential. Additionally, the candidate must be motivated by hands-on laboratory work.

*Requirements*

- B.S. or M.S. in Biological Sciences or related scientific discipline. Preference will be given to applicants with previous hands-on experience in molecular biology techniques.
- Minimum 1-3 years of hands-on experience with molecular cloning techniques.
- Working knowledge of molecular biology equipment and software platforms, specifically DNA construct design and sequence analysis with Vector NTI.
- Proficiency with standard software and statistical analysis is required (e.g. Microsoft Office).
- Highly organized and detail-oriented.

**To Apply:**

Please send resume and cover letter to [careers@eurekainc.com](mailto:careers@eurekainc.com).

**About Eureka Therapeutics, Inc:**

Eureka Therapeutics is a privately-held biotechnology company headquartered in Emeryville, California, focused on developing first-in-class T cell-based immunotherapy for hematological malignancies and solid tumors. Eureka is a leader in the discovery of novel antibody immunotherapies. Our core technology platform centers around the discovery and engineering of fully-human antibodies against intracellular oncogene targets via the MHCII complex. We have built multiple drug pipelines for various cancer indications, with the most advanced pipeline at IND enabling stage. In addition to our internal drug discovery programs, Eureka has ongoing partnerships with Memorial Sloan Kettering Cancer Center, City of Hope National Medical Center, and Boehringer Ingelheim.
