

Research Scientist, Cell Biology
Eureka Therapeutics, Inc.

Location: Emeryville, CA 94608

Position type: Full-time

Required education: Ph.D.

Area(s) of expertise desired: Cell Biology, Immunology

Description:

The Research Scientist, Cell Biology will join an experienced in-house team in the discovery and development of fully-human therapeutic antibody drugs for innovative cancer immunotherapies.

The candidate will actively participate in scientific discussions and contribute to experimental designs related to his/her own scientific projects. He/she will perform hands-on bench work including, but not limited to, mammalian cell culture, virus transduction and production, phenotypic characterization of human T cells, T cell activation/cytotoxic killing assay, FACS, immunofluorescence, ELISA, ELISPOT, cytokine and chemokine detection. He/she will develop multidisciplinary knowledge and expertise in translating the latest biomedical discoveries in breakthrough cancer immunotherapies.

Qualifications:

The ideal candidate will have a comprehensive understanding of T cell immunology combined with practical and technical experience in cell biology and oncology. He/she is a hard-working and motivated team player with a can-do attitude.

Requirements

- Ph.D. in Cell Biology, Oncology, Immunology, or related field with post-doctoral or industrial experiences. Previous experience in antibody drug discovery is preferred.
- Proven track record of success in scientific creativity and independent thinking, including a strong publication/patent record.
- Excellent communication skills, including written reports/scientific publications, and presentations to the senior management team and external stakeholders.
- Strong analytical and problem-solving skills.

To Apply:

Please send resume and cover letter to careers@eurekainc.com.

About Eureka Therapeutics, Inc:

Eureka Therapeutics is a privately-held biotechnology company headquartered in Emeryville, California, focused on developing first-in-class T cell-based immunotherapy for hematological malignancies and solid tumors. Eureka is a leader in the discovery of novel antibody immunotherapies. Our core technology platforms center around the discovery and engineering of fully-human antibodies against intracellular oncogene targets via the MHCI complex. We have built an early stage pipeline of innovative drugs, with the most advanced candidates at preclinical stage. In addition to our internal drug discovery programs, Eureka has ongoing partnerships with Memorial Sloan Kettering Cancer Center, City of Hope National Medical Center, and Boehringer Ingelheim. For more information about Eureka Therapeutics, please visit: www.eurekainc.com.
